
Dragonfly Reverb

Dragonfly Reverb is a bundle of free audio effects for Linux, MacOS, and Windows.

Download

- **Linux**
- **MacOS**
- **Windows (32 bit)**
- **Windows (64 bit)**

Dependencies

Dragonfly reverb requires GL \geq 3.0 to show the graphical interface.

Building

On Linux or MacOS, invoke the following commands to build Dragonfly Reverb.

```
1 git submodule update --init --recursive
2 make
```

Linux Build Dependencies

- libx11-dev
- libxext-dev
- libxrandr-dev
- libgl1-mesa-dev
- libjack-jackd2-dev

You can build against the system freeverb3 with using `SYSTEM_FREEVERB3=true` at build time. If this flag is not set, the bundled freeverb3 will be used. If `SYSTEM_FREEVERB3=true`, the build also requires `libsamplerate`.

Cross compiling for Windows (on Linux)

Dependencies

```
1 sudo apt install wine i686-w64-mingw32-gcc i686-w64-mingw32-g++ x86_64-w64-mingw32-gcc x86_64-w64-mingw32-g++
```

32 bit

```
1 make clean
2 make CC=i686-w64-mingw32-gcc CXX=i686-w64-mingw32-g++
```

64 bit

```
1 make clean
2 make CC=x86_64-w64-mingw32-gcc CXX=x86_64-w64-mingw32-g++
```
