
PXAlertView

PXAlertView is a UIAlertView replacement similar to the style in iOS 7 but with a block based API and the ability to customise the styling and add custom views.

Preview

Features

- Simple block syntax instead of delegates
- Animations that match UIAlertView in iOS 7
- Fully customisable
- Add your own UIView beneath the title

Installation

Add the following to your CocoaPods Podfile

```
1 pod 'PXAlertView', '~> 0.1.0'
```

or clone as a git submodule,

or just copy `PXAlertView.h` and `.m` into your project.

Usage

See `PXAlertView.h` for the complete API.

An Example

```
1 [PXAlertView showAlertWithTitle:@"The Matrix"
2     message:@"Pick the Red pill, or the blue pill"
3     cancelButtonTitle:@"Blue"
4     otherButtonTitles:@"Red"
5     completion:^(BOOL cancelled, NSInteger buttonIndex) {
6         if (cancelled) {
7             NSLog(@"Cancel (Blue) button pressed");
8         } else {
9             NSLog(@"Other (Red) button pressed");
10        }
11    }];
```

TODO

- Add style that matches iOS 7 exactly
- Ability to dynamically specify the styling of UIAlertView: default/dark
