
Venom

Offensive Security Framework for Vulnerability Scanning & Pentesting

OS Linux, Windows

python 3.6+

License GPLv3

image size 238 MB

image size 238 MB

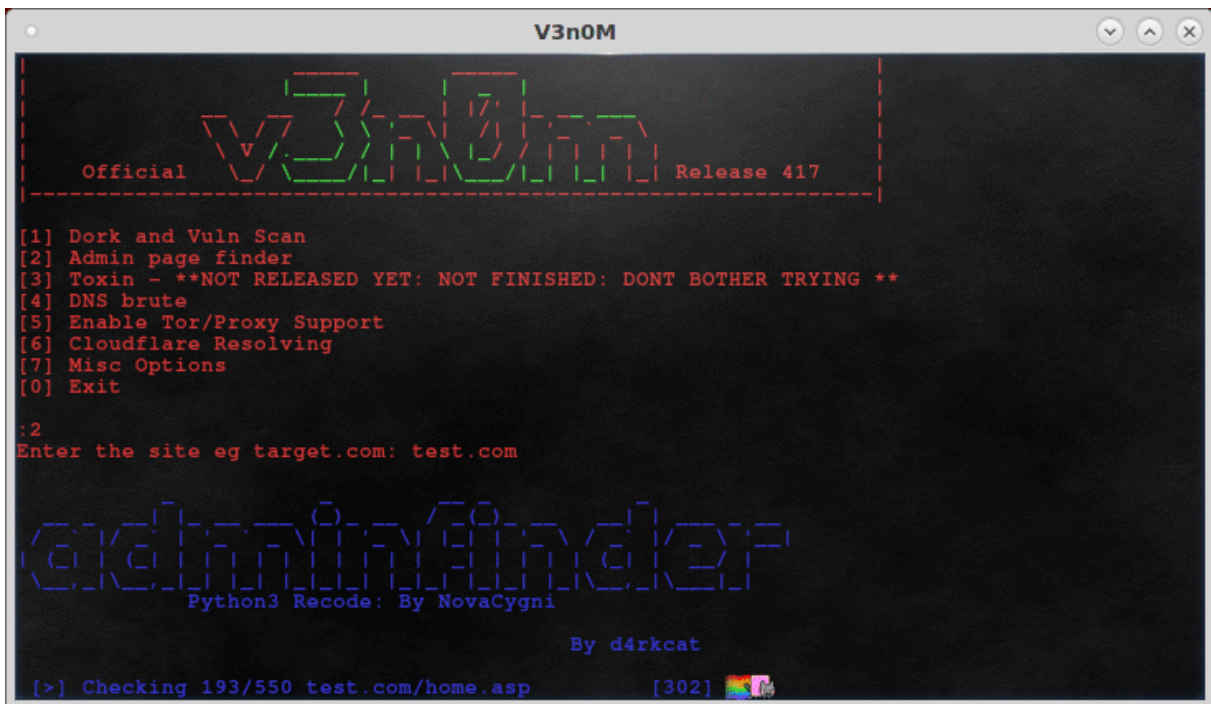

code style black

Warning: Version 4.3.3 now requires PROXIES/VPN.

Features

- ☒ Cloudflare Resolver [Cloudbuster]
- ☒ LFI->RCE and XSS Scanning [LFI to RCE & XSS]
- ☒ SQL Injection Vuln Scanner [SQLi]
- ☒ Extremely Large D0rk Target Lists
- ☒ Detects known WAFs
- ☒ AdminPage Finding
- ☒ CCTV/Networked Interfaces discovery [WIP] ««
- ☒ Vulnerable FTPs Scanner [Toxin]
- ☒ DNS Bruteforcer
- ☒ Python 3.6 asyncio based scanning

- ☒ Cloudflare resolver
- ☒ Extremely quick “Toxin” Vulnerable IP scanner to scan potentially millions of ips for known vulnerable services.
- ☒ Free and Open /src/
- ☒ Cross-platform Python-based toolkit
- ☒ Licensed under GPLv3
- ☒ Built by hackers with full transparency
- ☒ No more issues with dependencies from pre-alpha release

This is outdated.

NOTE: You MUST install these on Ubuntu and Kali.

Ubuntu users: Please make sure you `sudo apt-get install python3-bs4 | apt-get install python3-setuptools`

Kali users: Please `apt-get install python3-dev | apt-get install python-dev`

NOTE: Install Poetry for deps:

```
curl -sSL https://install.python-poetry.org | python3 - poetry
install # install deps poetry update # when you want to check for
deps updates
```

Docker users: Please see Dockerfile

Contact Information:

- 1 Submit a bug report/pull request with prefix "Query" at the start.

Credits to:

- 1 - Architect **for** the initial encouragement and support in V3n0ms early days
- 2 - SageHack **for** allowing Cloudbuster to be adapted **for** use within V3n0M
- 3 - D35m0nd142 **for** allowing Collaboration and the use of LFI Suite within V3n0M
- 4 - b4ltazar & all members of darkc0de.com **for** inspiring the project with darkd0rk3r
