
ForceBlur

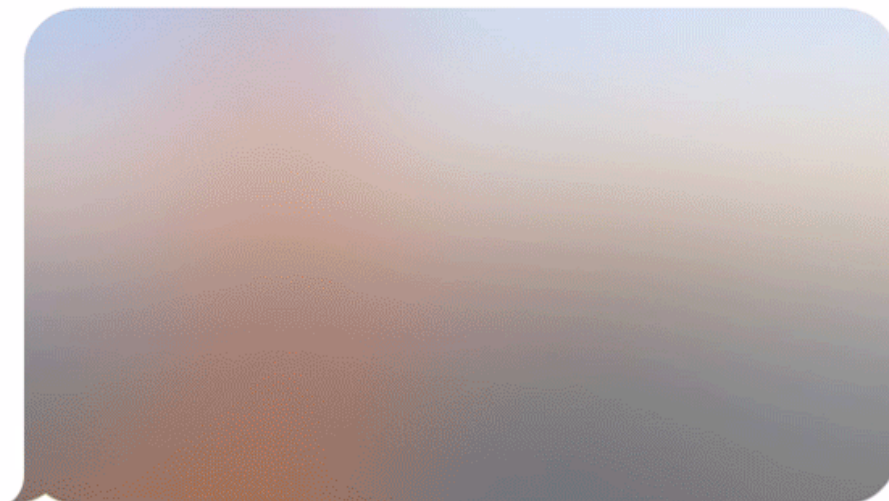

Swift 3.0 pod v1.0

Inspired by this project on Dribbble

Today 12:49

Hey honey

I got something to show you

DAMN! 😍

Read how we made it on our blog

Features

- ☑ Display private content
- ☑ Easy to use
- ☑ Use with storyboards, XIBs, code
- ☑ Compatible with JSQMessagesViewController

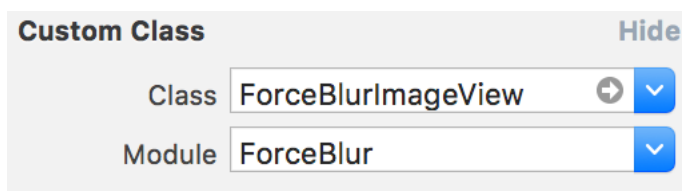

ForceBlurImageView

- iOS 9+
- Xcode 8
- Swift 3

Usage

In interface builder (storyboard, xib)

To use the component in interface builder you need to set custom class for UIImageView:

Also make sure the module is set to `ForceBlur`.

In code

You can treat `ForceBlurImageView` as `UIImageView`:

```
1 let imageView = ForceBlurImageView(image: image)
```

With JSQMessagesViewController

Use `ForceBlurPhotoMediaItem` instead of `JSQPhotoMediaItem`, that's it!

Normal photo:

```
1 let photoItem = JSQPhotoMediaItem(image: image)
```

Blurred photo:

```
1 let photoItem = ForceBlurPhotoMediaItem(image: image)
```

Installation

CocoaPods

```
1 pod 'ForceBlur', '~> 1.0'
```

For JSQMessagesViewController extension add:

```
1 pod 'ForceBlur/JSQMessagesViewController', '~> 1.0'
```

The dependency includes JSQMessagesViewController itself.

Let us know!

We'd be really happy if you sent us links to your projects where you use our component. Just send an email to github@yalantis.com And do let us know if you have any questions or suggestion regarding the animation.

P.S. We're going to publish more awesomeness wrapped in code and a tutorial on how to make UI for iOS (Android) better than better. Stay tuned!
